1 Company Overview

Company Name:

Fixify-A Service Marketplace

Slogan:

“Trusted professionals, reliable service, every time.”

Idea

Fixify is a digital marketplace platform that connects customers with verified service providers for home, technical, and maintenance services. It offers structured booking, secure authentication, order tracking, reviews, and messaging.

The system consists of:

- Public customer website
- Customer dashboard
- Provider portal
- Admin panel
- FastAPI backend with role-based access control

Vision

To become Pakistan’s most trusted and accessible service marketplace, enabling customers to book any essential service within minutes.

Mission

To simplify service access by combining:

- Transparent pricing
- Verified professionals
- Structured order flow
- Ongoing customer support

- Technology-driven accountability

2 Problem Statement

The Problem

In Pakistan's local service industry:

- Providers are often unverified
- Pricing is inconsistent
- No accurate cost estimation before booking
- No post-service accountability
- Booking depends on word-of-mouth referrals

Why It Matters

Essential services such as plumbing, electrical repair, cleaning, and appliance repair are often urgent. Poor service causes:

- Financial loss
- Safety risks
- Time waste
- Customer frustration

Who Is Affected?

- Urban households
- Students & renters
- Working professionals
- Small businesses
- Independent service providers

3 Products and Services

Fixify operates as a **multi-category service marketplace**.

A) Cleaning Services

- Home cleaning
- Kitchen cleaning
- Office cleaning
- Sofa cleaning
- Water tank cleaning
- Pest cleaning

How it works:

User selects service → enters details → books time → provider assigned.

Value:

Improves hygiene, saves time, ensures consistent quality.

B) Home Repair & Maintenance

- Plumbing
- Electrical
- Carpentry
- Painting

Value:

Provides a single trusted solution for recurring home maintenance.

C) Mechanical & Technical Services

- AC repair & installation
- Refrigerator repair

- Washing machine repair
- CCTV installation
- Home/office relocation

Value:

Covers both household and technical service needs under one platform.

D) Platform Support Features

- JWT-based authentication
- Role-based access control
- Order tracking
- Reviews & ratings
- Messaging system
- Complaint handling
- Admin monitoring dashboard

E) Future AI Innovation – Fixify AI Bot (Fixy Bot)

What it will do:

Fixify will introduce an AI-powered assistant called **Fixy Bot**.

Users will be able to:

- Upload photos of damaged items (e.g., leaking pipe, broken switchboard, AC issue).
- Receive an estimated cost range.
- Get a basic diagnosis of the problem.
- Receive recommended service category automatically.

How it will work:

- Image upload via frontend.
- Backend AI model processes image using computer vision.
- Model predicts:

- Problem type
- Severity level
- Estimated price range
- Suggests the appropriate service and directs user to booking page.

Why it is innovative:

- Reduces uncertainty before booking.
- Builds price transparency.
- Improves user trust.
- Speeds up booking decisions.
- Reduces unnecessary technician visits.

This feature positions Fixify as a **tech-driven intelligent marketplace**, not just a listing platform.

4 Target Market

Primary Market (B2C)

- Urban families
- Students
- Working professionals
Age group: 20–55 years

Secondary Market (B2B)

- Offices
- Clinics
- Retail shops
- SMEs

Geographic Focus

Phase 1: Lahore

Phase 2: Karachi, Islamabad, Rawalpindi, Multan

Phase 3: Nationwide expansion

5 Business Model & Revenue Strategy

Fixify uses a hybrid marketplace model:

1. Commission per completed order
2. One-time booking payments
3. Monthly maintenance subscription packages
4. B2B recurring service contracts
5. Sponsored provider visibility (future)

Additional Revenue from AI Innovation

- Premium AI estimation feature for detailed diagnostics
- Data-driven service optimization
- Dynamic pricing improvements using AI demand analysis

6 Technology Stack

Frontend

- React 19
- TypeScript
- Vite
- React Router DOM
- Axios
- Tailwind CSS

Backend

- FastAPI
- Uvicorn

- SQLAlchemy
- MySQL
- Alembic
- Pydantic
- Python-Jose (JWT)
- Passlib + Bcrypt
- CORS Middleware

Future AI Stack for Fixy Bot

- Python (AI model training)
- TensorFlow / PyTorch (Computer Vision model)
- OpenCV (Image preprocessing)
- Cloud GPU services (for model training)
- REST API endpoint for image prediction
- Storage system for uploaded images

Security Implementation

- JWT authentication
- Role-Based Access Control
- Secure password hashing
- Controlled CORS policies

7 Marketing & Sales Strategy

SEO Strategy

Target high-intent keywords like:

- “Plumber in Lahore”
- “AC repair near me”

Social Media Marketing

- Before/after service videos
- Technician spotlights
- AI feature demos (Fixy Bot)

Paid Ads

- Google Ads
- Meta Ads

Referral Program

- Customer referral rewards
- Provider referral bonuses

8 Company Structure & Employee Roles

Founders

CEO / Founder — Abdul Rehman

Strategic direction & partnerships

CTO / Technical Lead — Raahim Chaudry

System architecture & AI roadmap

COO / Operations Manager — Rayyan Kamran

Service operations & provider quality

CFO / Marketing & Finance Lead — Fahad Ahmed

Financial strategy & marketing

Additional Roles

Software Engineer

Builds frontend/backend features and AI integration.

AI/ML Engineer (Future Role)

- Train computer vision models
- Improve cost prediction accuracy

- Maintain AI pipeline

Skills: Python, TensorFlow/PyTorch, Computer Vision

UI/UX Designer

Improves usability and conversion flow.

Sales Executive

Acquires B2B contracts.

Customer Support Representative

Handles customer complaints and rescheduling.

Data Analyst

Tracks KPIs and demand forecasting.

Operational Workflow

1. Customer visits website.
2. Selects service OR uploads image to Fixy Bot.
3. AI provides estimated cost and service suggestion.
4. Customer confirms booking.
5. Backend validates request.
6. Order stored in database.
7. Provider receives job.
8. Service completed.
9. Customer reviews provider.
10. Admin monitors platform analytics.

10 Future Growth & Scalability

Innovation Roadmap

Phase 1

City expansion + provider onboarding system.

Phase 2

Launch mobile apps (Android & iOS).

Phase 3 – AI Expansion

- Improve Fixy Bot accuracy using real service data.
- Introduce smart provider matching.
- Dynamic price prediction engine.
- AI-powered fraud detection.

Technical Scaling

- Caching
- Database indexing
- Async task queues
- Monitoring & logging
- Automated testing

KPIs

- Monthly active users
- Repeat booking rate
- AI usage rate (Fixy Bot adoption)
- Estimation accuracy percentage

- On-time completion rate
- Customer satisfaction score
- Provider utilization rate
